Empower Your Students with Real-World IT Skills

Launch a Network Academy at Your School

Supported by the Georgia Cyber Center · Your Academy Support Center

Prepare Students for High-Demand Tech Careers

Curriculum Access

Offer free courses in Networking, Cybersecurity, Programming and IT Support. Designed for grades 6-12 and aligned to Georgia CTAE technical pathways.

Teacher Support

We train and mentor your instructors, even those without tech backgrounds. Includes onboarding, certification support, and instructional coaching.

Student Opportunities

Certifications, dual enrollment pathways, cyber competitions, and real-world tech skills that open doors to future careers.

Schoolwide Impact

Enhance your STEM and CTAE offerings, improve student engagement, and report measurable outcomes to leadership and stakeholders.

Provide your students the opportunity to learn IT and cybersecurity skills. Allow the Georgia Cyber Center to assist your school to launch, implement, and grow your program.
